## Stansted Expansion - good or bad?

Posted by Original forum - 2007/08/06 19:28

---

### Stansted Development Information:

Another controversial plan in the area is the expansion of Stansted Airport to encompass a second runway. Although this may benefit local businesses by increased trade, and benefit locals by improved routes and services, extra capacity means extra plane noise, pollution, busier roads, and a greater strain on the supporting Infrastructure.

Both sides of the argument can be seen by visiting the two links:

### Anti-Expansion Campaign:

<http://www.stopstanstedexpansion.com/>

or visit Stansted Airport at the this link: <http://www.stanstedairport.com>

But perhaps we can have an 'unbiased' territory here.

Tell us what you think.

### Black Holes

What is a black hole? Well, it's difficult to answer this question, since the terms we would normally use to describe a scientific phenomenon are inadequate here. Astronomers and scientists think that a black hole is a region of space (not a thing) into which matter has fallen and from which nothing can escape - not even light. So we can't see a black hole. A black hole exerts a strong gravitational pull and yet it has no matter. It is only space - or so we think. How can this happen? (wow gold)

The theory is that some stars explode when their density increases to a particular point; they collapse and sometimes a supernova occurs. From earth, a supernova looks like a very bright light in the sky which shines even in the daytime. Supernovae were reported by astronomers in the seventeenth and eighteenth centuries. Some people think that the Star of Bethlehem could have been a supernova. The collapse of a star may produce a White Dwarf or neutron star - a star, whose matter is so dense that it continually shrinks by the force of its own gravity. But if the star is very large (much bigger than our sun) this process of shrinking may be so intense that a black hole results. Imagine the earth reduced to the size of a marble, but still having the same mass and a stronger gravitational pull, and you have some idea of the force of a black hole. Any matter near the black hole is sucked in. It is impossible to say what happens inside a black hole. Scientists have called the boundary area around the hole the "event horizon." We know nothing about events which happen once objects pass this boundary. But in theory, matter must behave very differently inside the hole. wow gold

For example, if a man fell into a black hole, he would think that he reached the center of it very quickly. However an observer at the event horizon would think that the man never reached the center at all. Our space and time laws don't seem to apply to objects in the area of a black hole. Einstein's relativity theory is the only one which can explain such phenomena. Einstein claimed that matter and energy are interchangeable, so that there is no "absolute" time and space. There are no constants at all, and measurements of time and space depend on the position of the observer. They are relative. We do not yet fully understand the implications of the relativity theory; but it is interesting that Einstein's theory provided a basis for the idea of black holes before World of Warcraft Power Leveling, astronomers started to find some evidence for their existence. It is only recently that astronomers have begun specific research into black holes. In August 1977, a satellite was launched to gather data about the 10 million black holes which are thought to be in the Milky Way. And astronomers are planning a new observatory to study the individual exploding stars believed to be black holes.

The most convincing evidence of black holes comes from research into binary star systems. Binary stars, as their name suggests, are twin stars whose position in space affects each other. In some binary systems, cd keys, astronomers have shown that there is an invisible companion star, a "partner" to the one which we can see in the sky. Matter from the one which we can see is being pulled towards the companion star. Could this invisible star, which exerts such a great force, be a black hole? Astronomers have evidence of a few other stars too, which might have black holes as companions.

The story of black holes is just beginning. Speculations about them are endless. There might be a massive black hole at the center of our galaxy swallowing up stars at a very rapid rate. Mankind may one day meet this fate. On the other hand, scientists have suggested that very advanced technology could one day make use of the energy of black holes for mankind. These speculations sound like science fiction. But the theory of black holes in space is accepted by many serious scientists and astronomers. They show us a world which operates in a totally different way from our own and they question our most basic experience of space and time. Runes of Magic gold

### Excuse for Speeding Wow power leveling

Harry and Lloyd were speeding down the road. A police car pulled them over. Why on earth were you driving so fast? the policeman yelled. Our brakes are no good-so we wanted to get there before we had an accident Wow power leveling!

wow power leveling

ive Months Older

The Second World War had begun, and John wanted to join the army, but he was only 16 years old, and boys were allowed to join only if they were over 18. So when the army doctor examined him, he said that he was 18. But John's brother had joined the army a few days before, and the same doctor had examined him too. This doctor remembered the older boy's family name, so when he saw John's papers, he was surprised. How old are you? he said. Eighteen, sir, said John. But your brother was eighteen, too, said the doctor. Are you twins? Oh, no, sir, said John, and his face went red.

My brother is five months older than I am wow power leveling.

world of warcraft power leveling

A Sunday School helper was delivering a station wagon full of kids home one day when a fire truck zoomed past. Sitting in the front seat of the fire truck was a Dalmatian dog. The children began discussing the dog's duties. "They use him to keep crowds back," said one youngster. "No," said another, "he's just for good luck." A third child brought the argument to a close. "They use the dogs," she said firmly, "to find the fire hydrant world of warcraft power leveling."

The ability of the Kangaroo

The zoo built a special eight-foot-high enclosure for its newly acquired kangaroo, but the next morning the animal was found hopping around outside. The height of the fence was increased to 15 feet, but the kangaroo got out again.

Exasperated, the zoo director had the height increased to 30 feet, but the kangaroo still escaped. A giraffe asked the kangaroo, "How high do you think they'll build the fence?" "I don't know, " said the kangaroo. "Maybe a thousand feet if they keep leaving the gate unlocked world of warcraft power leveling.

### Wow power leveling

Blizzard Entertainment has released the minimum and recommended system specifications for the World of Warcraft expansion, Cataclysm. The specs ramp up the minimum computer needs a bit from where they stand now. Cataclysm is set to launch on December 7th so be sure your computer hits the mark.

Minimum Specifications:OS: Windows 32bit (SP3), Windows XP 64bit (SP2), Windows Vista 32bit (SP1), Windows Vista 64bit (SP1)

Processor: Intel Pentium 4 1.3 GHz or AMD Athlon XP 1500 Wow power leveling
